A Species-tree topology changes with chr4 mixture weight
Unrooted RF distance
observed transition interval
RF from J48_NONCHR4
RF from J48_T0
natural manifest fraction (0.099)
chr4 mixture weight ε
B Presence of the six reference-specific unrooted splits
Reference-specific split
T0 | N62_q1
T0 | Columbea_q1
T0 | N61_q2
non-chr4 | N62_q2
non-chr4 | N61_q1
non-chr4 | Columbea_q2
chr4 mixture weight ε
C Branch-local localPP for each reference-specific split
localPP (inferred branch)
orange: T0-specific
blue: non-chr4-specific
chr4 mixture weight ε
