Mai30 epsilon-mixture experiment (complete matched source pools)
A Evolutionary scenario and locus mixture
Mai 30-taxon fixed backbone
MSC loci
MSRC loci — rearrangement
ε = fraction of loci sampled
from the MSRC source pool
scaled WF: c = 0.001; complete pools only
B Topology error versus ε
normalized RF error
ε
042 suppression 1.0
042 suppression 0.5
042 suppression 0.1
007 suppression 1.0
007 suppression 0.5
007 suppression 0.1
C Branch-length error versus ε
mean absolute CULength error
ε
D Candidate population quartet reversals
fraction of sampled quartets with endpoint sign change
low ILS
042
extreme ILS
007
