A Unbalanced anomaly region
Switching ρ
Intermediate duration T_I
conservative bound: $T_I > 10(1-p)\log 2 = 3.47$\nfor $p = 1/2$
Γ(0101)
B q2 = q1 crossing for Z=0101
Numerical ρ^*
Intermediate duration T_I
operator root; uniqueness not proved
C Balanced versus unbalanced
unbalanced Γ
balanced Γ
unbalanced Δ
balanced Δ
Margin
Switching ρ
D Exact conditional path, Z=0101
q1
q2
q3
T_I
